Subject: How to upgrade to 4.5.0.66
Date: Tuesday, October 14, 2008 10:36:53 AM

To our valued BlackBerry® Customers:

U.S. Cellular® is proud to release from RIM (Research in Motion) an upgraded Software Package for the BlackBerry® Curve 8330 Smartphone and the BlackBerry® Pearl 8130 Smartphone. The upgrade is available to any user currently on an older version and is FREE to download. The new software version is 4.5.0.66, this download is available by clicking on the following link to our U.S. Cellular® website and clicking download for the specific device you are using. Please be aware that this may take 30 minutes to an hour to complete depending on the amount of information you have in your device. It is also recommended that you select the backup option when it is asked in case you have a problem with the download. Thank you and have a great day!

What does the upgrade offer?
*Improved email layout, calendar lookup, remote search in your email inbox, the capability to edit Microsoft Word, PowerPoint and Excel files through Documents to go. Improved Music and Media Management.

Please click on link below to start the upgrade process!
